# DIGITAL ACADEMY

PHILIP
KHUNWANA

During the 6 month period of the IT: Systems Support learnership programme at The Digital Academy **Philip** and his team created a mobile application called **Edu-Inc**.

Philip's main responsibilities on the project were working on Frontend using HTML, CSS, Angular and Bootstrap.
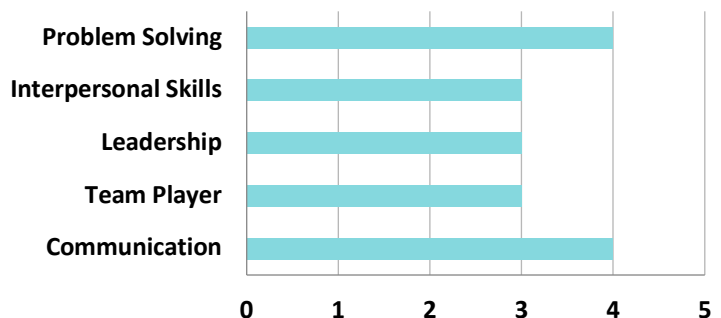

I would have no hesitation in recommending **Philip** as Junior Software Developer. He is strong willed and determined to gain knowledge, as well as complete tasks assigned to him. He goes the extra mile and never shying away from helping his colleagues.
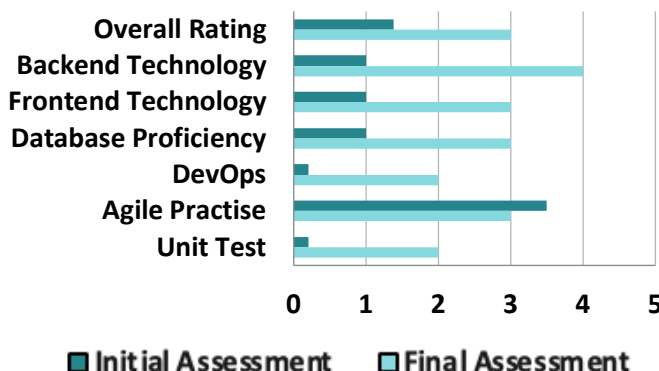

SOFT SKILLS

Philip's most improved competency:

Problem solving

The skill to determine the source of a problem and find an effective solution and is able to deal with problems calmly and efficiently within the team.

Problem Solving — 4
Interpersonal Skills — 3
Leadership — 3
Team Player — 3
Communication — 4

Problem Statement

In South Africa we face an education problem. Teachers in many schools do not have the correct resources/training to provide the best education for our youth. How can we use technology to solve this problem?
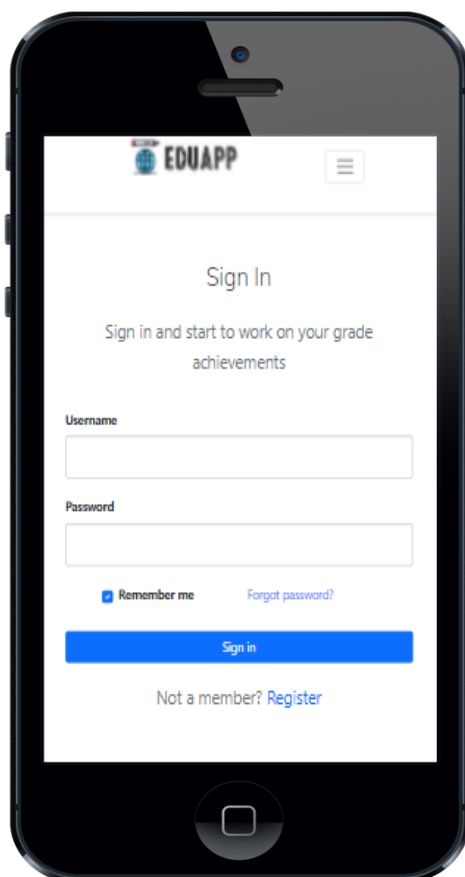

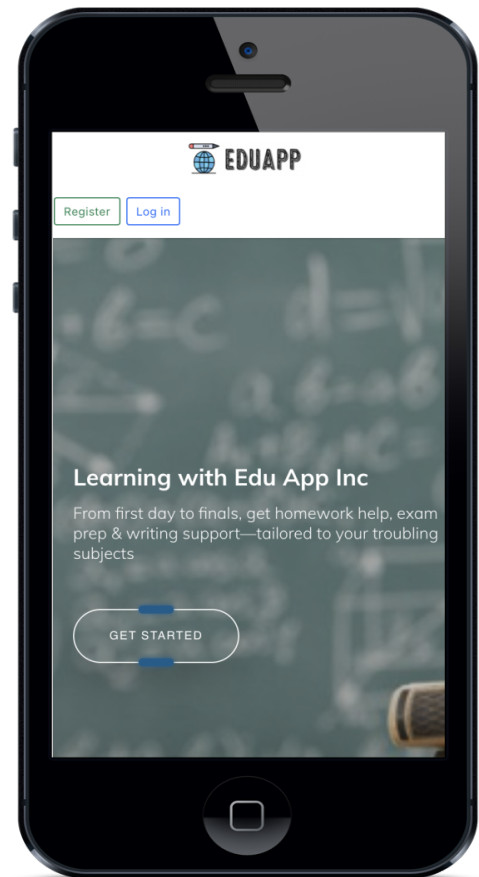

Solution

We are providing learners with a safe and easy to use platform which gives them the opportunity to communicate with teachers from across the country, and get an understanding of a particular topic/subject that they are encountering problems in.

Landing page

The landing page is the first page that the Users see when they open the application.

Sign-In

This page allows the User to login into our application or register a new account.

Learner page

A learner will be able to add or remove subjects they want to see on their profile. By selecting specific subjects the application will filter out teachers and groups for those specific subjects.

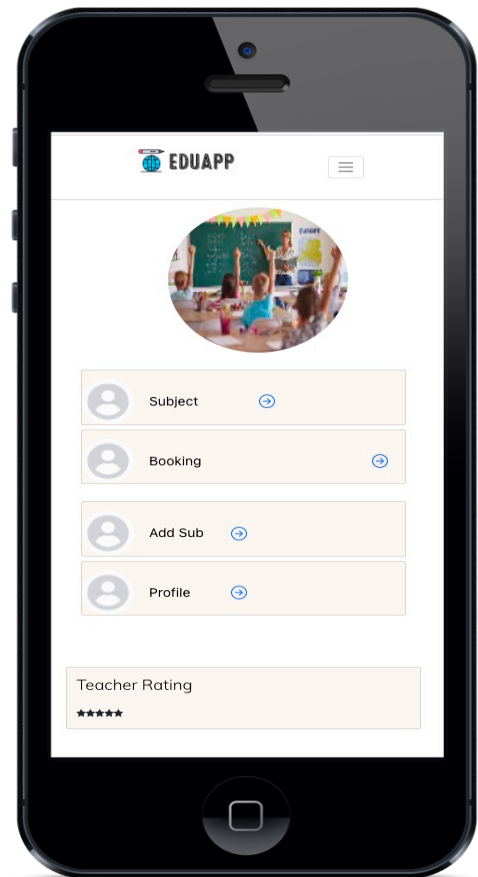

Group Discussions

Learners and Teachers are matched according to the filters and a group discussion can be created.

Teacher Page

Each teacher has their own Profile/Teacher page. This is where teachers add in the subjects they teach, manage bookings and edit their basic information.

Admin Home page

An admin will be able to view all subjects and users in the application as well as to activate and suspend users
